Status of the Application

Claims 1-61 are pending. Claims 22, 24, 27, 47-49, 51-53 and 55-61 are currently under examination. The claims are now subject to a restriction requirement as per below due to the amendment to claim 22 in the reply filed 04/16/2009. MPEP 811, specifically 811.02 states:

37 CFR 1.142(a), second sentence, indicates that a restriction requirement will normally be made before any action upon the merits; however, it may be made at any time before final action. This means the examiner should make a proper requirement as early as possible in the prosecution, in the first action if possible, otherwise, as soon as the need for a proper requirement develops.

Before making a restriction requirement after the first action on the merits, the examiner will consider whether there will be a serious burden if restriction is not required. 37 CFR 1.142(a), second sentence, indicates that a restriction requirement will normally be made before any action upon the merits; however, it may be made at any time before final action. This means the examiner should make a proper requirement as early as possible in the prosecution, in the first action if possible, otherwise, as soon as the need for a proper requirement develops.

Before making a restriction requirement after the first action on the merits, the examiner will consider whether there will be a serious burden if restriction is not required

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Claim 22 is drawn to an exon region of IL-12 or IFN-gamma. The exon regions of these cytokines are distinct from each other and a search and examination for each of these cytokines are burdensome because the searches are not coextensive.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
